Product Description

GYTA53 is an outdoor use optical fiber cable suitable for duct and aerial applications. This double-jacketed underground cable features robust construction for demanding environments.

GYTA53 cable is a type of outdoor, armoured fiber optic cable designed for long-distance, high-capacity communication networks. It is commonly used in both aerial and underground installations.

Key features include:

- Central tube design with stranded loose tubes and water-blocking gel
- Corrugated steel tape armor for physical protection against rodent bites and moisture
- PE sheath material for durability in harsh conditions
- Available in various fiber counts to meet different capacity requirements
- Customizable sheath materials for specific environmental conditions
