Product Description

GYTA Outdoor Fiber Optical Cable

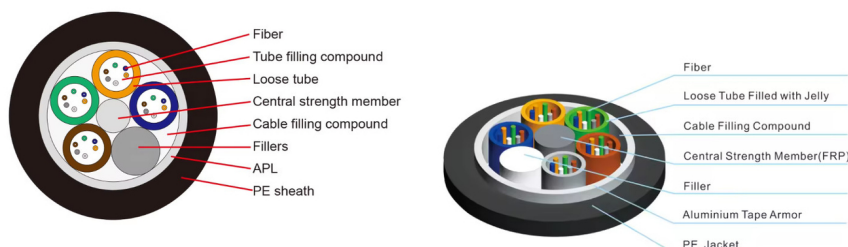

The GYTA series of fiber optic cables, equipped with a single jacket and armor around a loose tube, is engineered to accommodate a significant number of fibers. They exhibit exceptional flexibility and adaptability, making them indispensable for the most exacting installation demands of contemporary times, including those in ducts and buried conduits.

Features:

1. The cables feature low levels of dispersion and attenuation, optimizing signal clarity and reliability.
2. A carefully considered design, alongside meticulous management of fiber slack and a specialized stranding technique, results in exceptional mechanical and environmental properties.
3. Armored with corrugated steel tape, the cables are endowed with excellent moisture and crush resistance capabilities.
4. The cables' small diameter and light weight make them straightforward to install, reducing the complexity of the laying process.
5. They are designed to function effectively within a temperature range of -40 to +60 °C.
