Product Description

GYTA Outdoor Fiber Optical Cable

GYTA fiber optic cables, characterized by a single jacket and armor system around a loose tube, are intended to furnish a substantial fiber count. Their design ensures they are both flexible and versatile, fitting for the most stringent installation needs of the day, such as in ducts and underground conduits.

Features:

1. The cables are characterized by their minimal dispersion and attenuation, ensuring a high-fidelity signal transmission.
2. With a design that prioritizes fiber length precision and a unique stranding process, the cables possess remarkable mechanical and environmental adaptability.
3. The inclusion of corrugated steel tape in the armoring provides the cables with notable resistance to moisture and being crushed.
4. The ease of laying these cables is facilitated by their compact size and lightweight nature.
5. The cables are suitable for operation in temperatures ranging from -40 to +60 °C.
