Our Product Introduction

Product Overview

GYTS fiber optic cables feature an armored loose tube design with a singular jacket/armor construction. Engineered for flexibility and adaptability, these cables are built to withstand demanding installation conditions, making them suitable for both duct and underground conduit environments.

Key Features

- Excellent mechanical properties and temperature performance for diverse environments
- Hydrolysis-resistant and highly resilient loose tube material
- Single steel wire central load-bearing member for axial force resistance
- Protective PE sheath provides UV radiation resistance
- Complete cable core filling maintains structural integrity
- Corrugated steel tape armor offers superior crush resistance

Cable Structure

- Metallic (non-metallic) strength member
- Loose tube stranded construction
- Corrugated steel tape armored
- Gel filling for protection
- Polyethylene sheath for outdoor communication applications
