## Product Description

### GYFTY OUTDOOR OPTICAL FIBER CABLE

#### Products Description

GYFTY cables, designed as an outdoor solution for telecommunications and data transmission, feature non-metallic strength members and are encased in loose tubes filled with water-blocking gel to shield fiber optics from environmental hazards. Wrapped with aramid yarn for enhanced protection and flexibility, these cables boast an HDPE outer sheath that defends against UV rays, chemicals, and physical impacts. Versatile for aerial, duct, and burial installations, GYFTY cables are tailored for tough outdoor conditions and come in various fiber counts, compatible with diverse splicing and termination methods. They ensure high performance and enduring reliability for extensive and high-capacity communication networks.
