Product Description

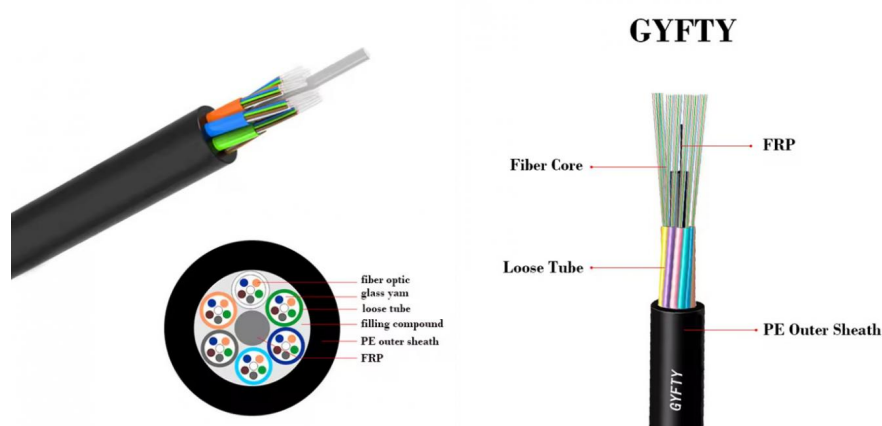

GYFTY OUTDOOR OPTICAL FIBER CABLE

Products Description

Specially crafted for outdoor telecommunication and data transfer needs, GYFTY cables utilize a non-metallic central strength member and loose tubes packed with water-resistant gel to safeguard the fiber optics from moisture and external elements. Fortified with aramid yarn for additional durability and pliability, an HDPE jacket encases the cable, offering superior protection against UV, chemical exposure, and mechanical damage. Ideal for aerial, duct, and direct burial setups, these cables are built to withstand severe outdoor settings and are offered in multiple fiber counts to suit varying capacity demands, aligning with a spectrum of splicing and termination techniques. GYFTY cables stand out for their performance, robustness, and dependability, proving ideal for long-haul and high-speed communication infrastructures.
