Product Description

GYFTY OUTDOOR OPTICAL FIBER CABLE

Products Description

GYFTY cables, engineered for external telecommunication and data transmission uses, incorporate a non-metallic central strength member encased by loose tubes filled with moisture-repelling gel to protect the fiber optics from environmental threats. Enveloped with aramid yarn for increased toughness and flexibility, the HDPE outer layer of the cable provides outstanding defense against UV light, chemical substances, and physical abrasion. Suitable for a range of installation methods including aerial, duct, and burial, GYFTY cables are designed to endure harsh outdoor elements and are available in an array of fiber counts to meet different capacity requirements, also being compatible with a wide array of splicing and termination procedures. They deliver superior performance and lasting reliability, positioning them as a prime option for long-distance and high-capacity communication networks.
