Product Description

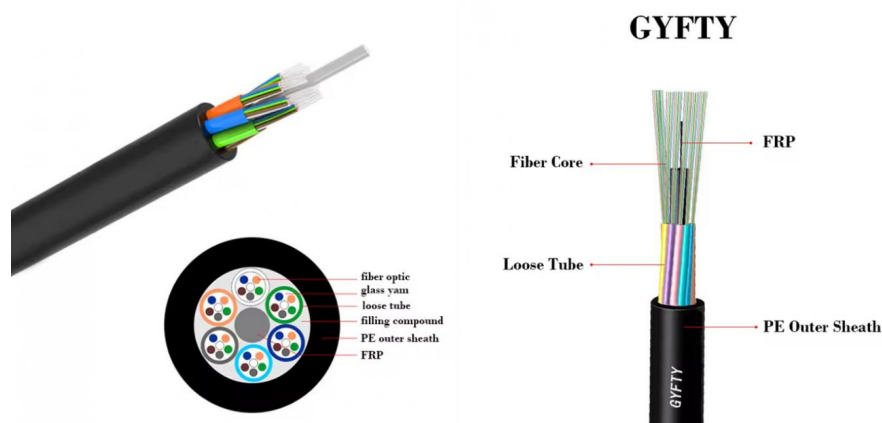

GYFTY OUTDOOR OPTICAL FIBER CABLE

Products Description

Tailored for outdoor telecommunication and data transmission tasks, GYFTY cables are equipped with a non-metallic central strength member and are shielded by loose tubes containing a gel that prevents water penetration, thus protecting the fiber optics from moisture and environmental stress. The cables are sheathed in aramid yarn for supplementary protection and adaptability, with an HDPE outer sheath that offers exceptional resistance to UV, chemicals, and physical harm. Fit for aerial, duct, and direct burial applications, GYFTY cables are constructed to handle the rigors of outdoor use and are supplied in various fiber counts to accommodate a range of capacity needs, also being compatible with numerous splicing and termination techniques. They are recognized for their high performance, durability, and reliability, making them well-suited for long-distance and high-capacity communication networks.
