Product Description

GYFTY Outdoor Optical Fiber Cable

Tailored for outdoor telecommunication and data transmission tasks, GYFTY cables feature a non-metallic central strength member and are shielded by loose tubes containing a gel that prevents water penetration, protecting the fiber optics from moisture and environmental stress. The cables are sheathed in aramid yarn for supplementary protection and adaptability, with an HDPE outer sheath that offers exceptional resistance to UV, chemicals, and physical damage.

Suitable for aerial, duct, and direct burial applications, GYFTY cables are constructed to handle outdoor use and are available in various fiber counts to accommodate different capacity needs. They are compatible with numerous splicing and termination techniques, recognized for their high performance, durability, and reliability in long-distance and high-capacity communication networks.
