Product Description

GYFTY OUTDOOR OPTICAL FIBER CABLE

Products Description

GYFTY cables, intended for outdoor telecommunication and data transmission, are highlighted by their non-metallic central strength members and are protected by loose tubes filled with a gel that wards off water, ensuring the fiber optics are safeguarded from dampness and environmental stressors. The cables are fortified with aramid yarn for extra resilience and flexibility, and an HDPE sheath that shields them from UV rays, chemical agents, and physical wear. Designed for aerial, duct, and burial installations, GYFTY cables are crafted to endure harsh outdoor conditions and are available in a variety of fiber counts to cater to different capacity specifications, also being compatible with a multitude of splicing and termination methods. They are celebrated for their performance, longevity, and trustworthiness, rendering them optimal for long-haul and high-capacity communication networks.
