Product Description

GYTA33 12 24 36 core direct burial armored submarine loose optic cable

Products Descriptions

The GYTA33 submarine fiber optic cable, designed for a fiber count of 2 to 72, incorporates a steel central member for strength and is packed with a jelly substance. The fiber is encased in a tube that can be filled with polypropylene if necessary, and is woven around a water-resistant gel. The cable is protected by an aluminum tape with a copolymer coating, wrapped in a polyethylene inner sheath, armored with a layer of steel wires, and sheathed in a polyethylene outer layer. It is specified for G652D single-mode fiber, with the option to adjust the details according to your needs.

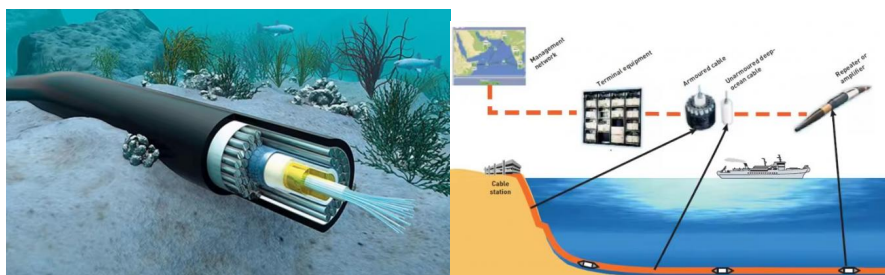

Product Details

Features:

- 1.The top-tier optical fiber delivers high-quality transmission characteristics.
- 2.The accurate regulation of the fiber's surplus length ensures superior mechanical and thermal performance.
- 3.The loose tubes, packed with a unique gel, provide flawless protection for the optical fibers.
- 4.The full-section water-blocking system ensures the cable's core is steadfast in its resistance to moisture and water.
- 5.The central strength member, a corrosion-resistant steel wire with an elevated Young's modulus, provides the necessary tensile strength. The cable's longitudinal armor, with a coated aluminum tape on both sides and a steel wire armor, meets the needs for high crush resistance, tensile strength, bulletproofing, and is suitable for heavy-duty direct burial or underwater laying
