Product Description

GYFXTBY Outdoor 12 24 core Single Mode Aerial Optical Fiber Cable

The wire is made up of a hollow core tube at its center, packed with an artificial oil-based gel that doesn't feed fungi, is not a conductor of electricity, uniform in composition, and devoid of any contaminants or extraneous materials. Two pieces of Fiber Reinforced Plastics (FRP) are aligned in a straight line next to the tube, with an outer layer of black polyethylene (PE) that is shielded from ultraviolet rays.

Products Structure

Compact Design for Self-Supporting Use: This cable is designed with a minimalist form factor that allows it to stand on its own, eliminating the need for additional support structures.

2 FRP Supports Long Span: It is reinforced with two Fiber Reinforced Plastic (FRP) supports that provide the necessary strength for spanning long distances without sagging.

Light Weight and Small Diameter: The cable is lightweight and has a small diameter, which makes it easy to handle and install in various environments.

Easy for Installation: Due to its light weight and compact size, the installation process is simplified, reducing the time and effort required to set it up.

Loose Tube with Gel Filled: The loose tube is filled with a gel that offers excellent protection for the fiber, ensuring durability and reliability.

Application

Apply to Long distance communication system, Local area network system and Subscriber network system
