## Product Description

### GYFXTBY Outdoor 12 24 core Single Mode Aerial Optical Fiber Cable

This cable features a central hollow tube filled with a synthetic, oil-based substance that is non-nutritive to fungi and does not conduct electricity. It is a clean, consistent substance free from impurities or foreign objects. Alongside the tube, there are two Fiber Reinforced Plastics (FRP) rods that run in the same direction, all encased in a UV-resistant black polyethylene (PE) jacket.

## Product Details

## Products Structure

**Streamlined Design for Independent Support:** The cable boasts a compact design that enables it to support itself without external assistance.

**Pair of Fiber Reinforced Plastic (FRP) Reinforcements:** It includes two FRP reinforcements that are designed to extend the cable's reach over long spans.

**Low Weight and Narrow Profile:** The cable's light weight and slender design make it straightforward to set up, reducing the physical effort needed for installation.

**Simplified Installation Process:** The ease of handling due to its light weight and small diameter contributes to a more straightforward installation experience.

**Superior Fiber Protection:** The gel-filled loose tube ensures that the fiber is well-protected, providing a high level of durability and resistance to environmental factors.

## Application

Apply to Long distance communication system, Local area network system and Subscriber network system
