Product Description

GYFXTBY Outdoor 12 24 core Single Mode Aerial Optical Fiber Cable

At the heart of the cable is a central tube filled with a synthetic oil-based gel that is neither a food source for fungi nor an electrical conductor. It is a consistent, clean material, free from any dirt or foreign particles. The tube is surrounded by two Fiber Reinforced Plastics (FRP) elements that run the length of the cable, with an outer covering of UV-resistant black polyethylene (PE).

Product Details

Products Structure

Self-Sustainability with Compact Form: The cable is designed for self-sustainability, with a compact form that reduces the need for additional support mechanisms.

Extended Reach with FRP Elements: It incorporates two Fiber Reinforced Plastic (FRP) elements that allow for extended reach, making it suitable for long-distance applications.

Easy to Handle Due to Light Weight and Small Diameter: The cable's light weight and small diameter make it user-friendly for installation, reducing the physical effort required.

Robust Fiber Protection: The gel within the loose tube offers excellent fiber protection, ensuring the cable's reliability and longevity.

Application

Apply to Long distance communication system, Local area network system and Subscriber network system
