Product Description

Product Description

Single-Jacketed Armored Fiber Optic Cable: This cable is designed with a solitary uni-tube that encases a loose buffer tube for fibers, followed by an armoring and jacketing process that ensures full-scale safeguarding.

Strengthened Core with Steel Tape and Polyethylene: The cable's central region is fortified by undulating steel tape, optimizing its strength, and then it's enveloped in a black polyethylene sheath to shield against environmental elements.

Tension Management with Embedded Steel Wires: The inclusion of two steel wires within the cable's structure is instrumental in achieving the optimal tension, guaranteeing the cable's steadfastness and operational proficiency.
