Product Description

Aerial Mini Figure.8 Fiber Optic Cable 12 Fiber Self-Supporting Aerial Optical Cable With 7 Wires GYXTC8Y

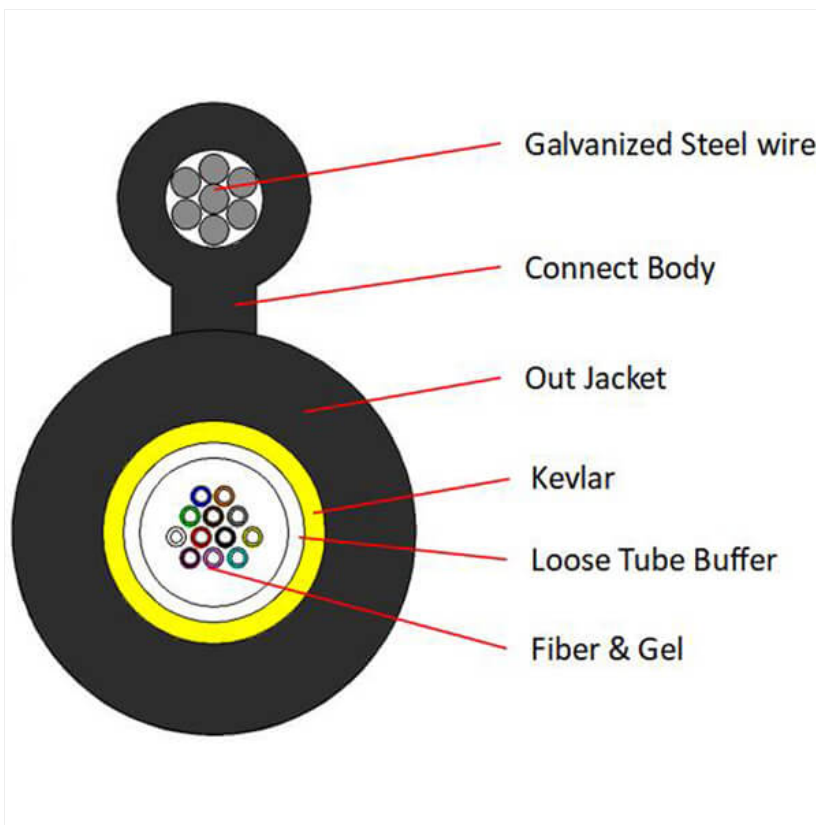

12 core optical cable is available in two structural types: outdoor and indoor configurations

Outdoor variants feature either central beam tube or laminate tube designs, with laminate tube being the preferred choice for its superior core capacity and enhanced protection

Central beam tube design utilizes a double steel wire reinforced structure without paste filling, positioned at the cable center

Laminate stranding configuration arranges optical fibers around a central stiffener for optimal performance
