Product Description

GYTC8S Fiber Optic Cable GYTC8S GYTC8Y Cable Overhead Cable Steel Tape Armoured GYTC8S Aerial Figure.8 Fiber Optic Cable Products Description

The GYTC8S is a standard self-supporting fiber optic cable, perfect for outdoor aerial use. Its notable moisture and crush resistance make it viable for duct and burial applications. The cable's metallic strength member, in the form of a figure-eight strand of wires, is sheathed in polyethylene. The cable's crush resistance and bullet resistance are thanks to its corrugated steel tape armor and polyethylene outer sheath. The tensile strength is improved by the central steel-wire strength member, which is complemented by a loose tube and a water-blocking system.

Details Images

A Figure 8 non-armoured fiber cable is crafted with a variety of materials: a stranded loose tube for fiber protection, a central steel wire to strengthen the cable, a core filler compound to ensure a consistent round shape, fillers to reinforce the structure, and a steel wire coated with phosphating or galvanization to prevent corrosion.
