Product Description

GYFTS53 Fiber Optic Cable Hot Selling Cable GYFTS53 Double Jacket Double Armoured

Product description

The core of the GYFTS53 cable is centered around a fiberglass-reinforced polymer (FRP) for its strength. The surrounding loose tube, along with its filler rope, is coiled tightly around this central core, creating a dense and cylindrical cable structure. The spaces within this structure are occupied by a water-blocking substance. A steel strip coated with plastic is then spirally wrapped and covered with a layer of polyethylene to form the inner sheath. The cable is further strengthened by wrapping a double-sided plastic-coated steel strip longitudinally, followed by the extrusion of a polyethylene sheath.

Product Details

Product Features

- Exhibits excellent mechanical strength and thermal stability.
- Features a robust, hydrolysis-resistant loose tube design.
- Utilizes a specialized filling compound for fiber optic protection.
- Equipped with a UV-resistant polyethylene sheath.
- Demonstrates strong crush resistance, suitable for duct and burial applications.
- Incorporates a single steel wire for central reinforcement.

Employs a unique filling material for fiber optic safeguarding.
Ensures complete cable fill with no gaps.
Implements an effective water-blocking mechanism to prevent vertical sinking.
