## Product Description

### GYFTS53 Fiber Optic Cable Best Price Underground Cable Armor Jacket G652D Cable

#### Product description

The GYFTS53 cable's core is reinforced by an FRP rod at its center. The cable's construction involves winding a loose tube and filler rope tightly around this rod to achieve a compact, round shape, with water-blocking filler in the interstices. A plastic-coated steel strip is then spirally wrapped and extruded with a polyethylene sheath. The final step is the longitudinal wrapping of a double-sided plastic-coated steel strip, also extruded with a polyethylene sheath.

#### Product Details

#### Product Features

- Presents remarkable mechanical robustness and thermal stability.
- Enclosed in a durable, hydrolysis-resistant tube.
- Utilizes a distinctive filling compound for fiber optic safeguarding.
- Wrapped in a polyethylene sheath that offers UV protection.
- Offers exceptional crush resistance, fitting for duct and direct burial.
- Supported by a single steel wire at its core.
- Contains a unique filling compound for fiber optic security.
- Completely filled to preclude any air gaps.
- Features a water-blocking tape to counteract sinking during vertical operations.
