GYFTS53 Fiber Optic Underground Armored Cable 2-12 Cores Outdoor

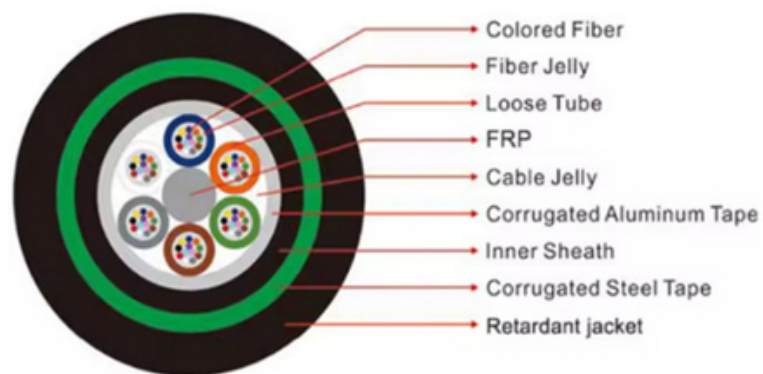

Product Attributes

Attribute	Value
Type	GYFTS53
Moisture Resistant	Yes
Temperature Rating	-40°C to 90°C
Application	Underground
Jacket Material	PE
Fiber Count	72 cores

Product Description

The FRP rod serves as the central strength member of the GYFTS53 cable's core. The cable core is formed by winding a loose tube and filler rope tightly around this rod, with water-blocking filler filling any gaps. A plastic-coated steel strip is spirally wrapped and extruded with a polyethylene sheath. The cable is completed by longitudinal wrapping of a double-sided plastic-coated steel strip, also extruded with a polyethylene sheath.

Key Features

- Excellent mechanical endurance and temperature resistance
- Strong, hydrolysis-resistant loose tube construction
- Special filling compound for fiber optic integrity
- UV-resistant polyethylene outer sheath
- Superior crush resistance for duct and buried applications

- Central steel wire for structural integrity
- Water-blocking tape prevents sinking during vertical deployment
- Completely packed to eliminate internal voids
