Product Description

GYFTS53 Fiber Optic Cable Underground Armored Cable 2 12 Cores Outdoor Cable

Product description

The FRP rod is the central strength member of the GYFTS53 cable's core. The cable's core is formed by winding a loose tube and filler rope tightly around this rod, filling any gaps with water-blocking filler. A plastic-coated steel strip is then spirally wrapped and extruded with a polyethylene sheath. The cable is completed by the longitudinal wrapping of a double-sided plastic-coated steel strip, also extruded with a polyethylene sheath.

Product Details

Product Features

- Provides excellent mechanical endurance and temperature resistance.
- Features a strong, hydrolysis-resistant loose tube.
- Infuses a special filling compound for fiber optic integrity.
- Sheathed in a polyethylene layer that shields against UV rays.
- Exhibits notable crush resistance, ideal for duct and buried applications.
- Centered around a single steel wire for structural integrity.
- Includes a special filling compound for fiber optic protection.
- Packed completely to avoid any internal voids.
- Equipped with a water-blocking tape to prevent sinking during vertical deployment.
