Product Description

The GCYFY fiber optic cable features a simple yet robust construction with FRP as its central reinforcing component, offering high modulus strength. The outer shell is made of PBT in a compact design. The stranding process winds the casing or filler strip around the FRP, integrating it into the cable's core before final sheathing.

Key Features

- Non-metallic construction effectively shields against radio-frequency and electromagnetic interference
- Compact cable structure prevents tube retraction
- Aramid reinforcement provides exceptional tensile strength
- Grease-filled tubes ensure waterproof capabilities
- Excellent flexibility and softness
