## Product Description

### GCYFY fiber optic cable duct fiber aerial fiber for metropolitan network micro cable

The GCYFY possesses a straightforward construction, with FRP as its central reinforcing component, exhibiting a high modulus. The outer shell, composed of PBT, is of a reduced size. The stranding process is utilized to wind the casing or filler strip around the FRP, integrating it into the cable's core, which is then encased in a sheath.

#### Product Details

- 1.The non-metallic construction of the cable effectively shields against radio-frequency and electromagnetic interference.
- 2.A specially designed, compact cable structure effectively prevents the tube from retracting.
- 3.The Aramid reinforcement within the cable provides exceptional tensile properties.
- 4.The tube is filled with a unique grease to guarantee the cable's waterproof capabilities.
- 5.The cable exhibits commendable softness.
