Product Description

GCYFY Outdoor Fiber Optic Cable

Products Description

GCYFY presents a minimalistic framework, with FRP as the central reinforcement, noted for its substantial modulus. The outer casing, constructed from PBT, is of a smaller size. The stranding process is implemented to twist the casing or filler strip around the FRP, forming the cable's core, and then it is wrapped with a sheath.

Product Details

Features:

1. The non-metallic composition of the cable is designed to prevent radio-frequency and electromagnetic interference.
2. The cable's structure is compact, engineered to prevent the tube from retracting.
3. The Aramid reinforcement in the cable ensures excellent tensile properties.
4. The tube is filled with a unique grease to guarantee the cable's waterproof performance.
5. The cable's softness is a significant attribute.
