Product Description

GCYFY Outdoor Fiber Optic Cable features a minimalistic framework with FRP as the central reinforcement, noted for its substantial modulus. The outer casing is constructed from PBT in a compact size. The stranding process twists the casing or filler strip around the FRP, forming the cable's core, which is then wrapped with a protective sheath.

Key Features

- Non-metallic composition prevents radio-frequency and electromagnetic interference
- Compact structure engineered to prevent tube retraction
- Aramid reinforcement ensures excellent tensile properties
- Tubes filled with unique grease for guaranteed waterproof performance
- Exceptional cable softness for flexible installation
