## Product Description

### GCYFY Fiber Optic Cable 48 Cores Factory Supply Single Mode Fiber For Air Blowing

The GCYFY cable is engineered with a minimalist approach, utilizing FRP as the central reinforcement with a high modulus. The exterior sheath is designed to be more diminutive. The process of stranding is employed to spiral the casing or filler ribbon around the FRP, which then gets incorporated into the cable's central structure and is sheathed.

## Product Details

### Features:

1. The cable's non-metallic design is effective in preventing radio-frequency and electromagnetic interference.
2. The cable's structure is compact, specifically designed to prevent tube retraction.
3. The Aramid reinforcement in the cable provides excellent tensile properties.
4. The tube is filled with a special grease to fully guarantee the waterproof performance of the optical cable.
5. The cable has good softness.
