Product Description

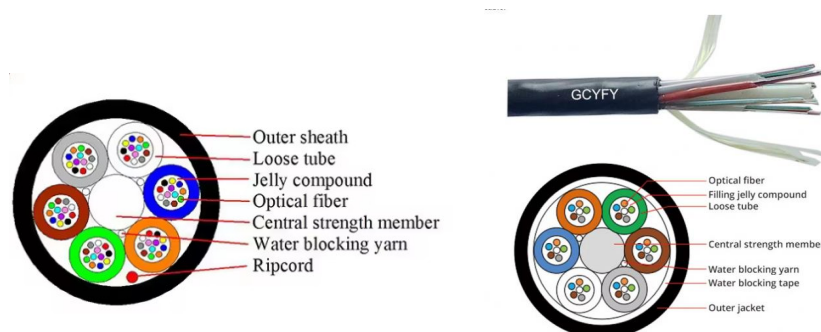

GCYFY Outdoor Fiber Optic Cable 12-144 Cores FRP Strength Member For Air Blowing

Products Description

The GCYFY boasts a simple framework, using FRP as its central reinforcement material, which is distinguished by a high modulus. The outer casing, made from PBT material, is smaller. The stranding method is employed to twist the casing or filler strip around the FRP, forming the cable's core, which is then covered with a sheath.

Features:

- 1.The cable's non-metallic construction effectively shields against radio-frequency and electromagnetic interference.
- 2.A specially designed, compact cable structure effectively prevents the tube from retracting.
- 3.The Aramid reinforcement within the cable provides exceptional tensile properties.
- 4.The tube is filled with a unique grease to guarantee the cable's waterproof capabilities.
- 5.The cable exhibits commendable softness.
