#### GCYFY Fiber Optic Cable PE Out Sheath Air Blown Blowing Optic Cable

The GCYFY cable features a straightforward structure with FRP as its central reinforcement, known for its high modulus. The outer casing, made of PBT, is compact in size. The stranding process coils the casing or filler strip around the FRP, which is then integrated into the cable's core and sheathed.

#### Key Features

- Metal-free structure effectively reduces radio-frequency and electromagnetic interference
- Compact design prevents tube collapse
- Aramid reinforcement provides superior tensile strength
- Tubes packed with proprietary grease ensure water resistance
- Excellent flexibility for easy installation
