Product Description

GCFYF Fiber Optic Cable PE Out Sheath Air Blown Blowing Optic Cable

GCFYF is characterized by its straightforward structure, with FRP as its central reinforcement, marked by a high modulus. The outer casing, composed of PBT, is smaller in size. The stranding process is utilized to coil the casing or filler strip around the FRP, which is then integrated into the cable's core and sheathed.

Product Details

Features:

1. The cable's structure, devoid of metal, efficiently mitigates radio-frequency and electromagnetic interference.
2. The cable's compact design is engineered to prevent the tube from collapsing.
3. The Aramid reinforcement in the cable ensures superior tensile characteristics.
4. The tube is packed with a proprietary grease to ensure the cable's water resistance.
5. The cable's flexibility is a notable feature.
