## Product Description

### GCYFY fiber optic cable micro optic cable air blown GCYFY 12-144 cores

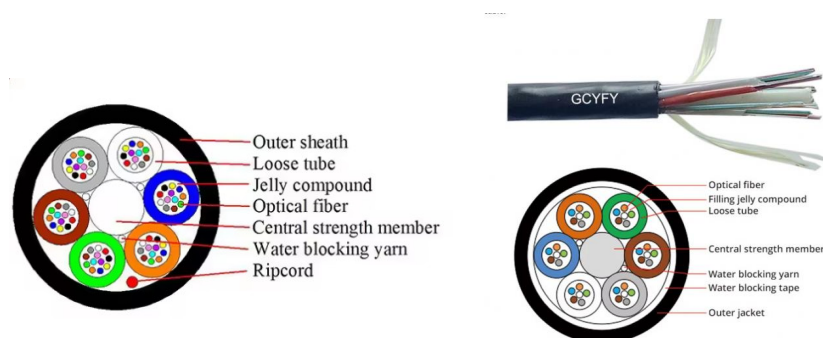

The GCYFY is designed with a simple structure, featuring FRP as its central reinforcement material with a high modulus. The outer casing, made of PBT, is of a reduced size. The stranding technique is applied to wind the casing or filler strip around the FRP, forming the cable's core, which is then sheathed.

## Product Details

### Features:

1. The cable's non-metallic framework effectively wards off RFI and EMI.
2. The cable's construction is compact, specifically designed to prevent tube retraction.
3. The cable's tensile strength is exceptional due to the Aramid reinforcement.
4. The tube is filled with a special grease to fully ensure the waterproof performance of the optical cable.
5. The cable is characterized by its good flexibility.
