Product Description

GJXFH fiber optic cable 1 core FTTH communication cable with FRP strength member

The butterfly optical cable is an innovative user access solution that merges the features of both indoor soft optical cables and self-supporting optical cables. It serves as an excellent alternative for addressing FTTX network challenges and plays a crucial role in constructing networks, including intelligent buildings, digital districts, campus networks, and local area networks.

STRUCTURE

The fiber optic drop wire unit is situated centrally, flanked by two parallel steel wires on either side. The cable is then finished with a black or colored LSZH sheath. FTTH stands for Fiber to Home, featuring a self-supporting design with 2*0.5mm FRP.

Introduction to ADSS Fiber Cable

ADSS fiber cables are highly resistant to environmental factors such as wind, ice, and UV radiation, making them suitable for long-distance communication networks.

How Much You Know About GYXTW-12B1?

We have established a complete set of independent laboratories, strictly in accordance with the IEC60794

What Is the Difference Between GYFTY Cable and Other Types of Fiber Optic Cables?

GYFTY Cable: Provides high flexibility, easy handling, and routing, making it convenient for installation and maintenance. Other Fiber Optic Cables: May vary in flexibility based on their design and construction, but GYFTY cable is known for its flexibility and ease of use.
