Product Description

Fiber Optic Drop Cable access to the use of dish-shaped optical cable (indoor wiring) is the optical communication unit (fiber) in the center, placed on both sides of two parallel non-metallic reinforcement (FRP) or metal reinforcing member, and finally extrusion black or color poly Vinyl chloride (PVC) or LSZH (LSZH, low smoke, halogen-free, flame retardant) jacket.

Structure

Special low-bend-sensitivity fiber provides high bandwidth and excellent communication transmission property

Two parallel FRP strength members ensure good performance of crush resistance to protect the fiber

Steel wire or massagers as the additional strength member ensures good performance of tensile strength

Simple structure, light weight and high practicability special flute design, easily strip and splice, simplify the installation and maintenance

Low smoke, zero halogen and flame retardant sheath
