## Product Description

### GJXH fiber optic cable Factory price indoor fiber optic cable single mode FTTH

The structure of fiber optic drop cables includes an optical communication fiber at the center, flanked by two parallel supports, either of FRP or metal. This is all enclosed in a jacket of black or colored PVC or LSZH, known for being flame-resistant and low in smoke emissions.

## STRUCTURE

Featuring low-bend sensitivity, this fiber provides high bandwidth and exceptional transmission efficiency.

The design includes two parallel FRP strength members that effectively protect the fiber from crushing.

Additional steel wires or reinforcement materials enhance its tensile strength.

Its lightweight structure and unique flute design make stripping and splicing simple, streamlining installation and maintenance.

The outer sheath is designed to be low smoke, halogen-free, and resistant to flames.
