Product Description

ADSS Fiber Optic Cable Stranded 16 core ADSS Span 50m Optical Fiber Cable for sale

ADSS optical cable, the optical cable uses a loose tube wound on the central strengthening member (FRP or steel wire) to form a complete round optical cable core, and is twisted by a certain number of aramid yarns after being covered with a PE inner sheath. Finally, another layer of PE outer sheath is extruded.

The loose tube of ADSS cable is made of high temperature resistant material.

Place multiple suitable single-mode or multimode optical fibers and optical fiber moisture-proof grease into the tube. The cable core gap is filled with water blocking agent.

Application

The actual status of overhead power lines is taken into full consideration when ADSS cable is being designed.

For overhead power lines under 110 kV, PE outer sheath is applied. For power lines equal to or over 110kV, AT outer sheath is applied.

The dedicate design of aramid quantity and stranding process can satisfy the demand on various.

Single Sheath ADSS Cable:

Construction:

This type features a single outer jacket layer. Lightweight: It's typically lighter than double sheath variants.

Applications:

Ideal for environments with lower risk of mechanical damage or where cable weight is a critical factor.

Cost-Efficient:
Generally more cost-effective due to less material usage.

Environmental Resistance:
Offers sufficient protection against UV rays, moisture, and minor abrasions.

Double Sheath ADSS Cable:

ADSS-D-48F

Construction:
Equipped with two layers of sheathing, an inner and an outer jacket.

Enhanced Protection:
Provides better mechanical protection, making it suitable for harsher environments.

Durability:
More resistant to abrasion, rodents, and other forms of physical damage.

Weight and Cost:
Heavier and typically more expensive than single sheath cables due to additional materials.

Applications:
Preferred in areas with higher potential for mechanical stress, such as regions with dense vegetation or frequent severe weather.
