Product Description

Aerial Figure 8 Fiber Optic Cable Armoured Aerial Self-Supporting Fig 8structure GYTC8S GYXTC8Y Figure Per Meter 8 12 24core Multimode Fiber Optic Cable Outdoor

The "figure-eight optical cable" (also known as "8-shape optical cable") is a type of optical fiber cable designed with a distinctive "8" shaped structure. This configuration consists of two optical fibers arranged symmetrically to form a figure-eight, offering enhanced durability and protection against mechanical stress. This design makes the cable particularly suitable for outdoor or harsh environments, including aerial installations and underground applications. It is commonly used in situations that require both robust physical protection and efficient data transmission, ensuring reliable signal performance in various telecommunications and networking systems.
