Product Description

The Aerial Figure 8 Fiber Optic Cable (GYTC8S) is a self-supporting cable designed for overhead installation. This optical fiber cable features an economical one-step installation process and delivers stable performance across a wide temperature range. The cable is compatible with all telecommunication optical fiber systems.

The loose tube design is filled with water-resistant compound or water-blocking material for moisture protection. Corrugated steel armor provides protection against animals and reduces long-term maintenance costs.
