Product Description

Duct Fiber Optic Cable Mine Optical Cable 8-Core 24-Core 36-Core MGTSV Mine Flame-Retardant Optical Cable Special Fireproof

- 1.Mining optical cable MGTSV is a special application of optical fiber cable in the field of communication, that is, communication optical cable specialized for the coal industry, is in the coal mine, gold mine, iron mine and other mining occasions under the optical cable.
2. Mining optical cable MGTSV not only inherits the full performance of optical fiber cable, but also adds many special properties because of the special requirements of the coal industry, the main added performance is flame retardant characteristics, anti-rat character-istics (mine special environment), because coal, gold, iron ore and other mines, especially coal mines for accidents, in order to ensure that accidents still ensure smooth communica-tion, To reduce losses, the State Administration of Work Safety 3.The standard certification of communication cable only one model, that is, MGTSV, and the corresponding requirements are as follows, in fact, the official practical scope is: mine, tunnel shaft, roadway.
